

Field Report
Kopp/Wilhelm Sandblasting
Springfield/Clark Co./SWDO
3/4/91
Shane/Kotsko/R

EPA Region 5 Records Ctr.

254964

On 3/4/91 Scott Shane of SIU and Chris Kotsko of DSHWM/SWDO inventoried 38 additional drums of waste found stored on Arnold Wilhelm's property. The investigators along with Cheryl Allen of DSHWM/SWDO's Solid Waste Section and Chris Budich of the Clark Co. Health Dept. first looked for more of Kopp's wastes in Wilhelm's buildings and surrounding property. No other wastes from Kopp were found.

The two investigators then inventoried all 38 containers (2 were 5-gallon cans). The inventory sheets are included in the case file. Seven samples were taken from seven drums. Three of the drums had prior Ohio EPA identifications on them. These included ES024 (now WS109), ES027 (now WS111), and ES022 (now WS114).

Sample Description:

- #1 WS107; 4 inches of black viscous liquid on top of black sludge; full 55-gallon drum; glass rod, 200 ml glass jar; Shane/Kotsko.
- #2 WS109 (ES024); full 55-gallon drum; black oil-like substance; glass rod, glass 200 ml jar; Shane/Kotsko.
- #3 WS111 (ES027); red viscous liquid (oil-like); full 55-gallon drum; glass rod, glass 200 ml jar; Shane/Kotsko.
- #4 WS114 (ES022); full 55-gallon drum; black liquid (oil-like); glass rod, glass 200 ml jar; Shane/Kotsko.
- #5 WS124; full 55-gallon drum; gray liquid, sediment on bottom; glass rod, 2 glass 200 ml jars; Shane/Kotsko.
- #6 WS126; full 55-gallon drum; clear liquid; field pH <3; glass rod, glass 200 ml jar; Shane/Kotsko.
- #7 WS102; full 55-gallon drum; green paint sludge; SS spoon, 1 quart jar; Shane/Kotsko.

Drum Description:

WS101	(010) amber color liquid, oil-like; full
WS108	clear liquid; full; pH ~6
WS117	clear liquid; full; pH ~6
